

Idaho Import Requirements for Canadian Cattle and Bison

- Must be accompanied by a current Certificate of Veterinary Inspection.
- An import permit must be obtained from ISDA prior to entry into Idaho.
- Each animal must be individually identified and listed individually on the Certificate of Veterinary Inspection.
- Each animal must have a hot-iron CAN brand placed high on the right hip.
- Brucellosis
 - Intact female cattle and bison must be official vaccinates.
- Tuberculosis
 - All intact dairy cattle 6 months of age or older require a negative TB test within 60 days of importation.
- Trichomoniasis
 - Non-virgin bulls and bulls over 2 years of age must have a negative Trichomoniasis test within 30 days of importation.
 - Bulls less than 2 years of age that are virgins must have a statement on the Certificate of Veterinary Inspection attesting to their virgin status.
- Cattle and bison destined for immediate slaughter are exempt from CAN branding and permit requirements..

Questions regarding specific Idaho import requirements should be directed to the Idaho State Department of Agriculture, Division of Animal Industries at 208-332-8540.
